Eduardo Villanueva

Software Engineering Student · Front-End Developer · Automation & Systems

Salt Lake City, Utah · edjvc24@gmail.com · github.com/Duado24 · linkedin.com/in/edvico24

I build practical tools for education technology and digital workflows, with attention to accessibility, usability, and the people using them.

EXPERIENCE & SERVICE

Instructional Design Assistant — Ensign College

April 2025 — Present

- Collaborate with instructional designers to build and update Canvas LMS course modules.
- Create reusable HTML/CSS content and templates, review usability, and improve layouts and navigation.

Volunteer Interpreter — No More A Stranger Foundation

Help Spanish-speaking immigrants communicate through translation and interpretation.

Sales Advisor — Net Axes S.A.C

January 2022 — December 2023

Developed customer communication experience in a sales role.

SELECTED PROJECTS

AutoCanv — Personal project / prototype

Local Canvas course review interface with structured findings and guarded formatting updates: preview, backup, apply, and verify. React, Vite, Python, FastAPI, and the Canvas REST API.

Canvas HTML Generator

Google Apps Script tool for reusable tabs and details components, layout presets, color controls, on-demand preview, and generated Canvas-compatible HTML.

DOE CyberForce Infrastructure — In progress

Preparing database and Web/NFS infrastructure through Linux administration, service baselining, networking, access controls, troubleshooting, and hardening.

EDUCATION

Ensign College — Bachelor of Applied Science, Software Engineering · Expected 2029

Lima University, Peru — Foundational International Business coursework · 2023
